CAREER OBJECTIVE

I am seeking a company where I can improve my skills and knowledge for organizational and personal growth.

EXPERIENCE

Kore.ai, Hyderabad – Software Engineer   (2020 Jan –Present)

Worked on a new product called 'Workflows Automation' which provides the ability to automate enterprise tasks and solutions.

Kore.ai, Hyderabad – Associate Engineer   (2019 Jun –2019 Dec)

Made several improvements to the platform. Added new features to the platform like Digital Views (Panels, Widgets, UI Forms, etc..)

PROJECTS

Chat Application — *Clone of FB Messenger using Nodejs backend and Reactjs frontend*

Based on the learnings from my company, I've built a web chat application which is similar to Facebook Messenger. This was built to learn and to try out technologies like Nginx, Rabbitmq & Redis.

Simple-Chess-Engine — *An NPM Module for Multiplayer Chess*
(Available at https://www.npmjs.com/package/simple-chess-engine)

Created an NPM Module called Simple-Chess with 1000+ downloads which can be integrated in any third-party apps to play Multiplayer Chess.

Reddit Clone — *Clone of Reddit using Django backend and Reactjs frontend*
(Hosted at my-reddit-webapp.herokuapp.com.)

This Web-app was created in a span of 1 month by learning Django and Reactjs during the process. On Reddit, Users can create *Subreddits* and make *posts* & *comments.* Each post can be *upvoted* as well as *downvoted.*

Fibonacci 2048 — *Fibonacci variant of 2048 with storage in C*

This system application is a variant of 2048 which uses Fibonacci sequence. Some of the features this game includes are Leaderboard, Save & Load Game, …
